SOLARLUX®

SOLUTIONS FOR
THE HOTEL, RESTAURANT
AND RETAIL SECTORS

CREATING SPACE TO BREATHE

For almost 40 years, Solarlux has represented exceptional quality in the production of versatile glazing solutions. Especially in these trying times, additional areas to give customers more space, consistent ventilation concepts and a flexible use of the space available are all-important in the restaurant, hotel and retail sectors.

More than ever, business owners need to be able to open up large sections of their ground plans to the outdoors, guide the flow customers and make all their entrances accessible. Factors such as saving energy, security, ease of operation and – last but not least – design and aesthetic diversity all have an important role to play here.

Wintergardens, glass canopies, glass houses, bi-folding doors and extra-large sliding windows cover all of these requirements. Here at Solarlux, your world-renowned partner based in Melle, Germany, we make high-quality projects of all shapes and sizes a reality – in short order and with no hassle.
